

# Deadline Information

Please visit your local conservation district and speak with the staff about the practices listed in this brochure that you are interested in implementing on your farm. There is a short one page application to fill out. Applications will be accepted continuously until all the funds are obligated. The four district partnership has established a ranking system to select those applications and you will be notified by your home district if your application is qualified.

Landowners/operators could receive up to a maximum of \$5,000 per calendar year under this incentive program. This would be a one-time payment upon completion and verification of the practice. Practices must remain on the ground for at least five years. Each applicant will be evaluated based on a ranking procedure developed by our technical resource partners to prioritize eligibility.

To fill out an application for this incentive program contact your local Soil & Water Conservation District.

**CRP & CWI  
Pollinator Add On**

How would you like to **help the Bees and Butterflies here at home?** Our practices not only protects water quality, but with the pollinator add on, reduces the alarming population decline of our native bees, honey bees, and butterflies.

If you sign up for new CRP and/or re-enroll one of the (\*) stated USDA-CRP practices (on the chart) we will provide a **\$100** incentive per acre towards adding 1 pound of forbs per acre.

We are looking for crop fields along streams to plant filter strips, or part of crop fields to plant field borders, or crop fields to plant wildlife plantings.

If there is a cropping history, these areas can be signed up into CRP. There is an **\$80** sign up incentive for you, plus a yearly soil rental payment (approx. **\$185 per ac.**) and cost share dollars to install the practice.

The CRP & CWI incentives should cover almost all of the cost to install the practice. (approx. **\$200 per acre.**)

It is easy to find out more without signing anything. Contact your local Farm Service Agency, Natural Resources Conservation Service or you local Soil and Water Conservation District.

There is nothing more beautiful than a field of flowers, bees and butterflies.

**Eligible Conservation Practices**

**Riparian Buffer**

**Tree Planting**

**Native Grass Planting**

**Wildlife Habitat Planting**

**Filter Strip**

**Hay/Pasture Planting**

**Be sure to read how to "sweeten" your deal !**

**Incentive payments:**

<b>Tree Planting</b>	<b>\$400/acre</b>
<b>Riparian Buffers (up to 180' wide)</b>	<b>\$400/acre</b>
<b>Native Grass Planting *</b>	<b>\$100/acre</b>
<b>Wildlife Habitat Planting (warm season grasses and shrubs) *</b>	<b>\$100/acre</b>
<b>Filter Strip (minimum 20' wide up to 120' wide) *</b>	<b>\$100/acre</b>
<b>Establishment of Grasses/Legumes (Convert cropland to hay or pasture only)</b>	<b>\$100/acre</b>
<b>* CRP &amp; CWI practices combination - Pollinator Add On</b>	<b>\$100/acre</b>

These practices have been selected for their ability to alleviate high nonpoint source sediment, nutrient, pesticide, and herbicide losses from land by restoring buffers and wetlands to improve water quality.
